Examiner:
Kerr, Kathleen

Serial No.: 09/518,081

Art Unit:
1652

Filed: March 3, 2000

For: METHODS AND COMPOSITIONS FOR INHIBITING APOPTOSIS
USING SERINE PROTEASE INHIBITORS (As Amended)

AMENDMENT

Commissioner of Patents
and Trademarks
Washington, D.C. 20231

Dear Sir:

This is in response to the Office Action mailed January 14, 2002 having a three month shortened statutory period of response set to expire April 14, 2002. Also submitted herewith is a Petition to extend the period for a Response one (1) month up to and including May 14, 2002, accompanied by appropriate fee. The following remarks and amendments are respectfully submitted.

In the Specification:

Please enter the following amended title:

Methods and Compositions for Inhibiting Apoptosis Using Serine Protease Inhibitors

Please enter the following amended first full paragraph of page 7:

There are numerous diseases that are characterized by excessive apoptosis. Among these diseases are autoimmune diseases, neurodegenerative diseases, myocardial infarction, stroke, ischemia-reperfusion injury, toxin-induced liver injury, sepsis, and AIDS.
